1 Status of OJB API's.....	2
1.1 PB API (Persistence Broker API).....	2
1.2 ODMG API.....	2
1.3 JDO API.....	2
1.4 OTM API (Object Transaction Manager API).....	2

## 1. Status of OJB API's

Status reports of the supported API's:

### 1.1. PB API (Persistence Broker API)

The PB API implementation is **stable**, known issues can be found in [release-notes](#) (release-notes.txt) .

### 1.2. ODMG API

The ODMG API implementation is **stable**, known issues can be found in [release-notes](#) (release-notes.txt) .

**Note:**

OQL is currently not fully implemented (Aggregations and Method Invocations).

### 1.3. JDO API

By providing a plugin to the SUN JDO Reference Implementation we provide a complete JDO 1.0.1 **prototype** O/R mapping tool. Integration in *managed environments* (in particular JTA integration) is not supported for JDO 1.0 prototype. A complete Apache licensed JDO 2.0 implementation is scheduled for OJB 2.0.

### 1.4. OTM API (Object Transaction Manager API)

The OTM Object Transaction Manager API is in *early beta status* and currently the work stopped.
