

File Edit Help

	Name	Kind	Type	Host
RootContext				
inner				

The left pane shows a hierarchical tree structure of contexts. The 'inner' context is currently selected, indicated by a gray background. A context menu is open over this node, displaying two options: 'New context' and 'Unbind name'. The 'New context' option is highlighted with a gray background, while 'Unbind name' is in white text on a light gray background.
