1 PS Serializer.....	3
----------------------	---

Warning:

This document was copied as is from the Cocoon 2.1 documentation, but has not yet been fully reviewed or moved to its new home.

1. PS Serializer

The ps serializer takes fo xml events as input. By using the FOP project it creates ps out of the sax events.

This serializer is optional and requires the fop package in the lib directory when building cocoon 2. However, the distribution includes this package already.

- Name : fo2ps
- Class: org.apache.cocoon.serialization.PSSerializer
- Cacheable: yes.
