1 Image Directory Generator.....	3
----------------------------------	---

Warning:

This document was copied as is from the Cocoon 2.1 documentation, but has not yet been fully reviewed or moved to its new home.

1. Image Directory Generator

The Image Directory provides all the functionality of the [Directory Generator](#). Additionally it ensures that the files are images and adds their dimensions (width and height) to the attributes. It is configured in the same way as the Directory Generator.
