This document was copied as is from the Cocoon 2.1 documentation, but has not yet been fully reviewed or moved to its new home.

1. Overview

This is a collection of tutorials. The Cocoon project is actively seeking additional tutorial contributors to expand this collection.

1.1. Tutorials

- [How to develop Web Applications](#)
- [Write a Custom Generator](#)
- [Building a RMI Server Generator](#) - Draft

1.2. Third-Party Tutorials

- [cocooncenter.org has a few tutorials and articles](#)
- [Galatea FlashGuides\(TM\)](#)
- [Cocoon 2 How-To Pages](#)
- Leigh Dodds's [Introduction to Cocoon 2](#) at the IBM developerWorks web site. Covers how to install and configure Cocoon, introduces the principles of the Cocoon 2 architecture and its key components, and provides example pipeline configurations which demonstrate how to construct a dynamic Web site using Cocoon and XSLT.
- Leigh Dodds's [Working with XML Server Pages in Apache Cocoon 2](#) at the IBM developerWorks web site. Introduces XML Server Pages (XSP), the Cocoon technology for generating dynamic XML content.
- Leigh Dodds's [Cocoon 2: Build database-driven sites](#) at the IBM developerWorks web site. Introduces basic concepts of the Cocoon 2 architecture and XML Server Pages (XSP) as a means for creating and publishing dynamic XML content.
